CS3 integration In Flash CS3, Adobe unveils a revamped interface, with features like object alignment, color, swatches, and scaling, all accessed using Illustrator-, Photoshop-, and InDesign-style panels.. Clipping masks from Illustrator CS3 are maintained in Flash CS3, along with opacity (transparency) settings.. Flash has two interacting components: ActionScript, Flash's powerful programming language, and the timeline-based stage, Flash's unique design environment for generating vector-based (scalable) animation.. Flash CS3 Professional, the first version of Flash released under Adobe's aegis, is arguably the most

dramatically enhanced program in the new CS3 suite.. The integration between Illustrator and Flash is, at this point, mostly a one-way street: however, a typical animation workflow involves drawing illustrations in Illustrator, and programming and animating in Flash.. When competitors Macromedia and Adobe published Illustrator and Flash, they were estranged cousins, sharing the ability to create scalable, vector-based graphics, but not communicating with each other very well.. Now Illustrator and Flash are kissing cousins Flash CS3 incorporates Illustrator's powerful Pen tool for drawing and editing curves.. Other thoughtful interface improvements include the ability to use your mouse's scroll wheel to scan through sets of layers in the timeline, and the ability to create tabbed panels—again as in Photoshop and Illustrator CS3. e828bfe731 Учебники B2 Немецкий
